NexaWorks: Response to RFP-2026-014: Cloud Contract and Invoice Management Platform for Meridian Manufacturing Ltd (fictional company)

1. Executive Summary and Understanding of the Requirement

NexaWorks proposes a configurable contract and invoice management platform delivered through a structured, phased implementation. We understand that Meridian's main risks are adoption across six plants, data quality during migration, and keeping the finance team's close calendar unaffected. Our proposal is designed around those risks, with a clear plan, a named team and a strong support model.

2. Proposed Solution and Implementation Approach

Platform: an API-first application with a standard SAP S/4HANA connector, single sign-on (SAML 2.0), and configurable approval workflows. The platform is hosted in a single EU region with a secondary region for disaster recovery. It meets the stated user volume with headroom; formal load-test results for 5,000 users will be shared at the design stage.

Delivery approach: four phases, namely mobilise, build, pilot at two plants, and roll-out to the remaining four plants. Each phase has entry and exit criteria, and a RACI matrix agreed with Meridian at kick-off.

3. Timeline, Team Structure and Milestones

Milestone	Target
Mobilisation and RACI agreed	Month 1
Design sign-off	Month 2
Build and SAP integration	Month 4
Pilot at two plants	Month 5
Roll-out to four plants	Month 6
Go-live and 6-week hypercare	Month 7

A team of eight with named roles: programme manager, solution architect, two engineers, integration lead, QA lead, change manager and a customer success manager. A staffing plan with availability by month is provided in the appendix. Training covers 40 super-users and role-based sessions for all approvers.

4. Price Table and Assumptions

Item	Price
Platform subscription (3 years)	USD 570,000
Implementation, training and hypercare	USD 340,000
Hosting, DR and operations (3 years)	USD 180,000
Total 3-year cost	**USD 1,090,000**

Assumptions: Pricing assumes 2,000 named users, one SAP connector and one data migration. Change requests are charged at a fixed day rate of USD 1,100. 24x7 support is included in the price.

5. Security, Compliance and Risk Controls

NexaWorks is ISO 27001 certified. A SOC 2 Type II audit is in progress, with the report expected in the next quarter. Data is encrypted at rest and in transit, role-based access control is enforced, and administrator accounts require MFA. EU data residency and a GDPR data processing agreement are standard.

A risk register is maintained for the programme. Top risks include late master-data cleansing (mitigation: early data profiling in month 1), plant resistance to change (mitigation: change manager and super-user network) and ERP release conflicts (mitigation: a frozen-interface window and contingency of three weeks).

6. Support Model, Relevant Experience and References

24x7 tier-1 support is included. Priority-one incidents receive a 30-minute response and a 4-hour resolution target, with escalation to a named customer success manager and a monthly service review.

NexaWorks has delivered four similar implementations for mid-sized manufacturers over the past five years. References: Brandt Packaging and Solvik Metals; contact details provided on request.

7. Commercial Terms and Validity

This response is valid for 90 days from the submission date. Prices are quoted in US dollars and exclude applicable taxes. Payment terms are 30 days from invoice, with implementation fees invoiced against agreed milestones.

The supplier confirms that it has read the RFP, accepts the evaluation process described in it, and will treat all Meridian Manufacturing information as confidential. Any exceptions to the draft contract will be listed during clarification.
